(54) Title: SYSTEM AND METHOD FOR PREPARING INDIVIDUALIZED DOSAGE FORMS OF MEDICAMENTS

(57) Abstract: The invention relates to methods for preparing individualized dosage forms of medicines, vitamins, mineral supplements and nutraceuticals in capsule or liquid form. The invention also relates to a system for preparing individualized dosage forms in which a processor is configured to identify a medicament formulation for an individual patient's dosaging needs and communicates this formulation information to a dispensing station where a capsule or a formulation of pellets of small diameter size for reconstitution into a liquid or semi-solid is formed that is specific to the individual's dosaging needs.
